

Piedmont Triad International Airport

A central location and state-of-the-art facilities make Piedmont Triad International Airport (PTIA) a catalyst for commercial and industrial development. Located at the center of North Carolina and the midpoint of the East Coast, PTIA is strategically positioned at the hub of the dynamic Piedmont Triad region, situated between the cities of Greensboro, Winston-Salem and High Point where I-40, I-85 and the future I-73 and I-74 converge. PTIA offers a wide variety of aviation-related services including air cargo service, commercial aircraft maintenance, and general aviation services.

Airport Facilities

Piedmont Triad International Airport is part of a 4,000-acre campus, home to more than 50 companies that infuse an estimated \$1 billion into the local community annually. More than 4,000 people work on the campus. PTI is owned and operated by the Piedmont Triad Airport Authority. No local tax dollars are used to operate the airport.

The passenger terminal building contains:

- 296,000 square feet of area on two public levels
- 65,000 square feet on the service level below ground level
- 25 aircraft parking positions adjacent to the two concourses
- Separate baggage claim and ticket counter areas for each concourse

The airfield facilities include three runways:

- The main runway 5/23 is 10,001 feet long
- The cross-wind runway 14/32 is 6,380 feet long
- Parallel Runway 5L/23R 9,000 feet long

Air Cargo Service

Because the region is the manufacturing center of North Carolina, PTIA's air cargo facilities offer an established international gateway superior to many larger markets. Flexibility of congestion-free air space, on-going expansion, regularly-scheduled international service and independent cargo support allows PTIA to handle virtually all types of cargo. PTIA is a multi-model cargo facility with virtually all major trucking lines operating terminals near the airport.

Air Cargo Companies

- FedEx Express Mid-Atlantic Air Hub—This one million square-foot state-of-the-art facility, is the fifth FedEx hub built in the U.S. with the capacity to sort 24,000 packages per hour.
- Mountain Air
