

FedEx Hub Fact Sheet

- The new FedEx Mid-Atlantic Air Hub - an almost 1 million square-foot facility - is operating at the Piedmont Triad International Airport. The facility is the fifth FedEx air hub to be built in the U.S. and will have the capacity to sort 24,000 packages per hour.
- The Greensboro FedEx Mid-Atlantic Hub is the company's fifth major U.S. air cargo hub. Others are located in Memphis, Indianapolis, Anchorage and Fort Worth. The hub will be serving primarily East Coast destinations. Packages originating on the East Coast for East Coast delivery will be handled through the Piedmont Triad hub.
- Some business advantages enhanced through a close location to a FedEx Hub are the ability to meet higher customer service expectations, have a more ambitious inventory strategy, focus more on supply chain optimization, ship to and from a variety of domestic or worldwide locations and have more shipping flexibility overall.
- The current FedEx operation is one of the original 11 distribution centers the company established 25 years ago. FedEx currently employs more than 250 workers in Triad area facilities.
- A third parallel 9000 ft runway is being constructed at PTIA to accommodate the hub operation.
- It is estimated that the FedEx hub will create nearly 20,000 new jobs in a 14-county area over a 16-year period. Total new wages and salaries are projected at \$5.5 billion, with a total value-added impact of \$9.3 billion on the Triad's economy.
