

Guilford Technical Community College (GTCC) provides customized, industry-specific workforce training programs to help companies achieve a world-class workforce. Most classes are taught at the business site, although they can be taught at at GTCC campus or another site. GTCC can help a company determine training needs and develop customized programs to meet those needs. The college is comitted to promoting economic growth in the community through the following initiatives:

Focused Industrial Training:

Funded through a state grant, the FIT program does not have the enrollment constraints other programs do, so GTCC can offer customized, small-environment classes in skills critical to a particular manufacturing company. Programs are directed toward workers who need to renew their skills and technical knowledge.

New and Expanding Industry:

GTCC can train workers to exact job requirements. This training is state-funded and is available to any new or expanding company that creates a minimum of 12 new jobs in the state. Regardless of the company's location, size, product or service, GTCC can provide a custom-designed employee training program at virtually no cost.

Occupational Extension & On-Site Training Programs:

This program provides affordable training for existing businesses starting with an on-site meeting to assess the client's needs, followed by a customized training program that can be delivered at a GTCC campus or at the business facility. The training is designed to minimized disruption to the business's schedule.

GTCC Quick Facts:

- Founded in 1958
- Campus locations in Jamestown, Greensboro, High Point, the T.H. Davis Aviation Center at PTIA, and the Small Business Center
- 12,381 students in curriculum programs
- 23,330 students in continuing education programs
